

WORKSHOPS

Today's world demands people to learn Excel and not just ordinary Excel but Advanced Excel that can solve a gazillion calculations in one go; solve the most complex of problems with just a Pivot Table. Ravi Kamana, a Microsoft Certified Solutions Associate & Microsoft Excel Specialist trained the students of the department in a five day workshop where they learnt the ability to create Pivot Tables, solve corporate problems at one go, and everything that is needed to sustain in a corporate entity. While it's important to think out of the box, it becomes extremely important to design one's thoughts and give direction to it. The students of Business Administration, Tezpur University too in order to build the aptitude to think in a way that solves problems, underwent a two-day workshop on Design Thinking. It was conducted by Tinker Labs. The objective of the workshop was to promote the mind in blending human centricity of design with the power of technology and business strategy in order to solve complex problems.

The students have also been extensively trained in order to be effective in Accounting which is a very critical component of business. Hence, the students have undergone Tally Training for a semester by Tally Academy on Tally.ERP 9 and are certified Tally Academy Accountants.
