Turnitin

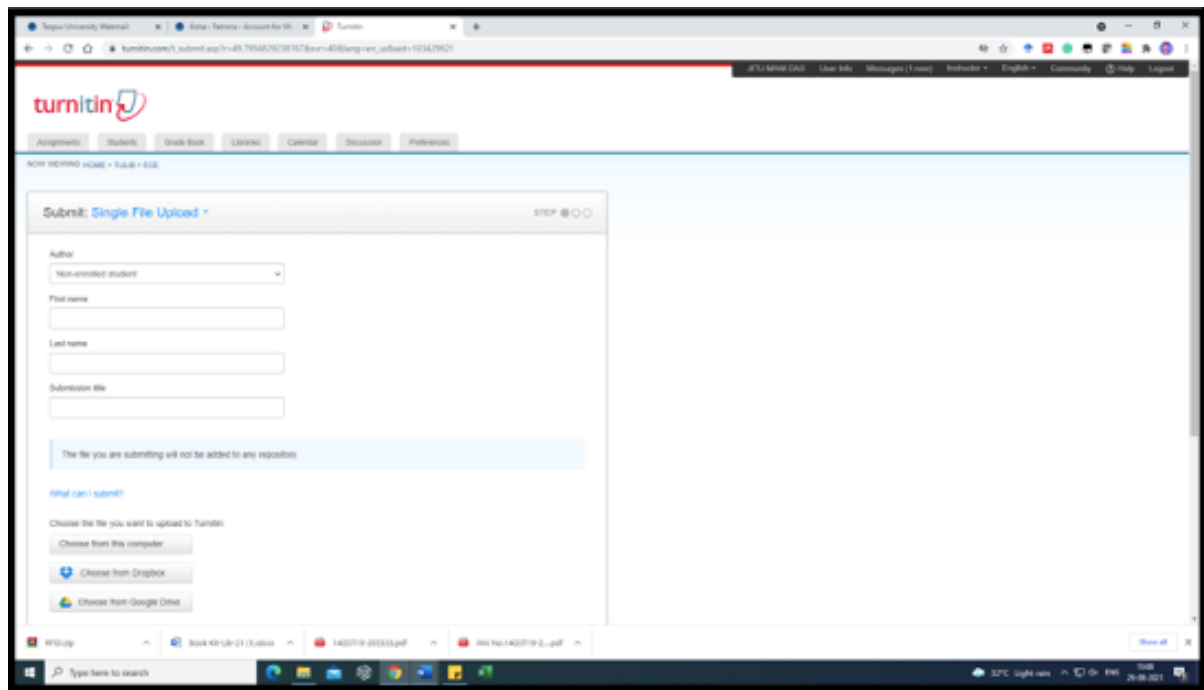

Anti-plagiarism software/tool cannot stop or prevent the plagiarism. Find/detect the sources of contents which are matching. Turnitin is a anti plagiarism software used for checking similarity in PhD thesis, dissertations and research publications of the university fraternity. The Turnitin software checks for potentially unoriginal content by comparing submitted documents to several databases using a proprietary algorithm. Similarity of the documents report is as per the UGC Regulation 2018 (https://www.ugc.ac.in/pdfnews/7771545_academic-integrity-Regulation2018.pdf). Turnitin anti plagiarism software is subscribed by University for the greater interest of the research output.
