Workshop on Forum Theatre

11-11 2019

Report on one-day Interactive theatre workshop held at the Department of Mass Communication and Journalism, Tezpur University; November 11, 2019, for students of M.A in Communication for Development (C4D)

Facilitator:

The one-day intensive workshop was facilitated by **Ravi Ramaswamy**, a Bangalore based Development practitioner and Theatre of the oppressed trainer with over a decade's worth of experience in the practice. He is a trustee at the Centre for Community Dialogue and Change (CCDC), Bangalore.

Ravi offers courses in Pedagogy and Theatre of the Oppressed to students and professionals of all backgrounds to explore various themes amongst which are masculinity, violence, gender and sexuality, social psychology, democracy etc.

He is currently engaged in a forum theatre project to identify the struggles and aspirations of young farmers.

Attendees:

The workshop was attended by both third and first semester students of Masters in Communication for Development (C4D), Tezpur University. In all, a total of sixteen students participated in the workshop.

Figure 1 Participants in a group picture

Workshop purpose:

It is, amongst other things, to further a practical understanding of the third-semester students on the importance of interactive theatre (theatre of the oppressed) in development communications and as a tool for community engagement.

Workshop in Brief

It began at forty minutes past the hours of nine on Monday, November 11, 2019, with almost all participants present.

The session began with an introductory remark by Dr Joya Chakraborty, HOD, Department of Mass Communication, Tezpur University. According to her, the workshop was necessitated on the grounds of serving the practical needs of students, who have had the privilege of being introduced to the subject matter on Theatre of the oppressed in theory as part of the C4D course curriculum.

“I always say my knowledge of the ‘theatre of the oppressed’ is self-taught. Here, you have the privilege of learning from a practitioner, who is best suited to teach it...”

Later, participants were introduced to the interactive games, which served as the basis for the workshop- prominent amongst which are, Cover the Space, Name playback, College Student Closing, Blind Car/Bus, Circle of Knots, Colombian Hypnosis, Carnival in Rio, Glass cobra etc.

The workshop was climaxed with an introduction to Image and forum theatres and Sculpting.

Theatre of Oppressed

Theatre of the oppressed was pioneered by Augusto Boal in his works with the Brazilian peasant population.

The form is now popular across the globe for social and political activism, resolution of individual and group struggles, community building, therapy and treatment and in the making of government legislations.

The form is neither theatre as entertainment, nor for propaganda, but a form of popular community-based education which is based on the vision of Paulo Freire and his landmark work on education, Pedagogy of the Oppressed.

This form of theatre essentially is a tool that helps ‘unfreeze,’ break identified patterns that impeded real communication among communities by making them aware of their full potentials through dialogues.

Brief on participatory Games facilitated during the Workshop

Cover the space

This activity allowed for a reflection on the use of individual space while respecting other occupants of the same. So, participants were given the leverage under the instruction of the facilitator to ‘walk the space.’- which in this case is the venue of the workshop. Each individual had the opportunity to cover a given distance without bumping into anyone.

The next phase in this game was for all participants to while walking their space observe others without talking but stop or move, whenever there was such action from any participant from within the vast space. This awakened a sense of alertness and being observant of others in the exercise of one's freedom.

Outcome

Based on participants feedback, this activity, most importantly; made it possible for one to reflect on communication by observation- the rule of thumb for participants to abide by the rules governing the game without faltering.

College Student Closing

This game started with participants forming groups of three each. Of the three persons in each group, one represented a college with the remaining two being a student and 'closing.' The ones representing the college and closing came together to form a structure, which served the purpose of a structure over the student. The idea is every student is deserving of a college to study.

Of the total participants present, one was left without a group. After the structure (college) is formed, the one without a group in want of one takes the centre stage; he/ she calls out one of the designations (College, student, closing). In the event of calling out student, all students within a structure together with the one left without a college, move in search of a new one for enrolment. In the end, one student again is left without a college leading to a repeat of the process altogether.

Outcome

There was a constant struggle for a college by students and the general search for an association by all. Participants in this activity were on keen alert to find a student for their college and vice versa.

According to a participant "It didn't feel good being left alone without anyone to form a college with, or find a college as a student. Hence, there was a need to constantly be on the alert, in order to find a college. It felt good to belong and not left alone."

Name playback

This activity served as an introductory ground for other activities and games to follow through seamlessly. It offered participants the chance to introduce themselves to each other in a fun way.

This game is especially useful when there are new people present. It started with a participant pronouncing his name aloud for all present accompanied by a demonstration. Other participants after, repeat the name and mimic the demonstration accordingly. This is repeated by the entire group until the last participant.

Outcome

It served an icebreaker. Participants familiarised with each other. It also helped loosed the hitherto tense atmosphere for the utmost participation of all. In the words of Ravi "It is a simple

icebreaker useful for introducing people to each other and helping people learn each other's names."

Blind car/Bus

This activity required participants segregated into groups of two each. Instructively, in a defined alignment, the one in front with eyes closed only moved, having being signalled via a touch from the one behind.

With eyes closed, the member in front moves in a defined direction depending on the nature of tap/touch received. A touch/tap on the right shoulder meant a move in the right direction and vice versa.

However, a touch/tap at the back signals a halt in movement, with a touch on the head signalling a forward/start movement.

Figure 2 Cross section of participants in the Blind bus game

Outcome

Reflecting on the activity, members viewed the exercise as depicting the struggles of the blind in society.

Colombian Hypnosis

In pairs of two, participants had the opportunity of either acting in the position of a leader or follower. The leader led by gesturing with the palm (hand) with the follower having no other option except to follow the direction as is being gestured.

Figure 3 Participants in demonstration of the Colombian Hypnosis game

Outcome

According to feedback solicited, this game made participants rethink leadership and followership. Sample of the participant shared the view that “leadership was empowering and offered a sense of fulfilment and authority.” Others held that “it was intriguing to know you have the power to have others do things your way.”

These observations according to them triggered the desire for a position of leadership always. Interestingly, however, others held that “leadership was a difficult undertaking considering the responsibilities attached to it.

For this reason, they preferred being/ acting in the position of a follower. Their desire, as shared, is premised on the belief that being a follower presents an opportunity to be in the position to act, offering a sense of accomplishment and responsibility.

Carnival in Rio

This is a community-building exercise conducted with four different groups, with four members each. At the group level, the instruction was for members to individually produce a sound but in the long, achieve sync with other members of the group irrespective of their individual sounds.

Then each group was given the opportunity to present the process each undertook to arrive at the ultimate sound.

Outcome

Of the discussion, based on the process presentation, it was realised that though each individual started with a sound peculiar to them, such was abandoned for the common good of group uniformity.

“I like my sound but I chose to abandon it for the group’s good. I realised sticking to mine sound made it difficult for us to achieve a pleasant sound as a group...”

Regardless of group peculiarity, it was common for individuals to abandon their sounds for a dominant one voluntarily. Members shared was due to individual feelings of being over-powered, preference for the sound of others amongst other things.

Image Theatre & Forum Theatre

Image theatre draws on the use of body shape to express emotions and feelings. With this activity, a volunteer from amongst the audience started by assuming an expression through a demonstrated bodily posture. Participant audience each took a turn to participate by adding to the bodily expressive demonstration as it suits their understanding and appreciation.

In an adaptive manner, the image theatre set the pace for discussion amongst the participants, who shared their views on what to them worked best.

The opportunity was given to each, based on opinion shared to come up stage to demonstrate their share of a solution to the problem on display.

This brought to the fore, the idea of participation, where members easily more than sharing their views, had the chance to practicalize it. This gave basis to leading change from a much pragmatize point of view till the best solution according to the entire group was arrived at.

The Glass Cobra

The workshop was climaxed with the Glass Cobra activity explained below:

It is a widely appreciated exercise developed by Augusto Boal based on a Chilean legend. Here, participants stood in a circle close to each other and with eyes closed feel the head and shoulders of the person in front of them.

They remember details of the 'head' so that they can later locate it. Then the participants walk away from one another and with eyes closed try to locate the person who was in front of them. Once they locate their partner, they place both their hands on the partner's shoulders. The game continues until the circle reforms.

It was an exhilarating experience for participants, who were awestricken by the reality of returning to the normal circle shape, even with their eyes closed.

Workshop on Planning C4D campaigns

11-11 2019

EVENT REPORT

WORKSHOP ON CAMPAIGN PLANNING

DEPARTMENT OF MASS COMMUNICATION AND JOURNALISM

TEZPUR UNIVERSITY

On 11 November 2019, the Department of Mass Communication and Journalism conducted a day-long seminar with the third semester MCJ students on the topic “Campaign planning” in the department premises. The workshop was headed by Dr. Sanjeev Kumar, an independent consultant, trainer, guest faculty at IIMC, BIMTECH, Tezpur University, IIMR, XIC, IIPA, NALSA, DLSA, FICCI and a national level resource person in advisory boards, think tanks and review committees.

Dr Sanjeev Kumar, PhD (JNU), MBA (MDI), PGD in Communication (XIC), has over 30 years of experience in the development, communication and media, research and capacity building arena working with Government (Ministry of Health and Family Welfare, Ministry of Women and Child Development, Ministry of Rural Development, Ministry of Drinking Water and Sanitation), the private sector (Medica Synergie) and national and international civil society (The Michel Group USA, HLSP UK). He has previously worked in senior and top management capacity full time with MOHFW, MWCD, NACO, Population Council, CARE India, HLFPPPT, PATH, UNICEF, UNAIDS, UNDP, World Bank and PWC. He has worked with research organizations like AC Nielson, CMS, IPSOS, TNS MODE and VIMARSH. He has been a part of several large scale social campaigns, film production and communication campaign evaluations.

The purpose of the workshop was to help the students understand the concept of campaign planning to enable them to formulate successful communication campaigns on social issues concerning the communities in and around them. It was conducted over two sessions in which he discussed his experiences, did a few practical activities and interacted with the students to help them develop their understanding of the concepts.

SESSION I: INTRODUCTORY SESSION

In this session, Dr. Sanjeev Kumar introduced himself to the students attending the workshop. He then asked the students to introduce themselves in ways that highlight their hobbies and unique pursuits. In this session, he brought out the importance of situation analysis in a campaign plan. He talked about how conditioning of our minds tends to stop us from thinking differently. Conditioning is also a large part of the reason as to why most communities do not undergo a behavioral change despite having prior knowledge about it. Later he asked, “What is a message?”. To this, the students replied with variants like message is information, emotion, gesture, request, question, etc.

After a short tea break, the students were asked to sit in the groups in which they did their campaign planning. He taught the step by step process of campaign planning and emphasised on the importance of primary data in the formation of a baseline. Primary data can be collected in the form of surveys which can be a Community Needs Assessment (CNA) or a Knowledge Attitude Practice (KAP) survey. This formative research is done to know about the existing knowledge of the community. “Knowledge is not equal to doing it,” says Mr. Kumar. When the community situation is ‘I don’t know and I don’t do it’ it means the campaign has to focus on creating awareness but when the situation is ‘I know but I still don’t do it’ then the campaign will have to focus on behavioral change. Hence, finding out the reasons behind the existing behavior patterns is important. This is referred to as problem analysis. To explain this better, Mr. Kumar cited the example of the Swachh Bharat Mission in which he was an active member. To make the community realise that what they are doing is wrong, they have to be triggered using a visualization process that would help change their perception. He says, “Changing knowledge is easy but changing perception is not”. Finding out the underlying beliefs, perceptions, barriers, norms, opinions, ideas, myths and misconceptions within the community will help realise the reasons behind their current behavior which can only be found out by formative research. Only after this can a strategy be planned.

He then conducted the 3 circle experiment. Having shown 3 identical circles on the projector screen he asked the students to spot the differences between them. He later reveals that each of them was the shadow of a cone, a circle and a cylinder when seen from above. This shows that if we only look at the shadows, we will miss the reality behind it. Hence, it is important to look at a problem from all possible perspectives before setting out to find the solutions to it. “Formative assessment will give us all the blocks and research will give us all the keys”, he said.

Towards the end of the session, he conducted the rope experiment where he tied the hands of a pair of students and got them intertwined with each other. He then asked them to detangle without opening or cutting the rope. This exercise highlighted the fact that most times the solution of a problem lies elsewhere and not only in the affected area as the ropes could be detangled through one of the four nodes where the ropes were tied to their hands and not in the region where the ropes intersected.

The workshop then recessed for a lunch break of 40 minutes.

Figure: During the rope experiment

SESSION II: CAMPAIGN PLANNING SESSION

In the second half of the campaign post lunch, each of the groups were asked to give a three-minute presentation of their respective communication campaign planning progress detailing all the aspects like situation analysis, stakeholder and target group identification, communication objectives and strategies, campaign message design etc. As the groups presented one after the other, the workshop emerged as a forum for discussion for a range of topics of local significance like- awareness campaign on increasing total fertility rate (TFR), deprivation of basic needs of electricity in Amolapam village, campaign for spreading adult literacy, electricity conservation in Tezpur University campaign, safety of T.U students outside the immediate campus boundaries, facilitating employment opportunities amongst people of Napaam, body shaming awareness at Tezpur University campaign, mom-shaming awareness campaign, prenatal care campaign and gender sensitisation campaign.

With every topic, he suggested a few changes in the way to make the implementation crisp and efficient. In the case of the first group, he pointed out that they should aim to reduce the TFR and not focus on birth control, which was their earlier motive. He also narrowed down their target audience to newly married couples and couples with one or two children only as opposed to their earlier target of all adults. With the second group, he highlighted the importance of making informed choices. He said that in order to combat the problem of lack of electricity the people should be made aware of all the choices available to them (solar panels and the traditional electric lines) so that they can make the right choice and not regret it later. As far as the third group was concerned he brought out the difference between an intervention and a communication process. He said sometimes campaign planners may overstep their boundaries and propose an intervention instead of a communication campaign. During the presentation by the fourth group, Mr. Kumar asked the members to be specific about their output products whether it is in the form of posters, pamphlets, street plays, etc. During this discussion, he recommended the students that whatever data is to be collected must be as recent as possible and should always be verified from multiple sources.

The discussion was punctuated by a short tea break, where the students informally interacted with Mr. Kumar who gave them an interesting exercise to encourage analytical thinking. The students were asked to form a circular human chain and were then directed to face the opposite side without breaking the chain. The students tried a few solutions before finally making a breakthrough and solving the problem, thus marking the end of the break.

As the session resumed and the other campaigns were discussed, Mr. Kumar used his expertise and experience to identify the loopholes and gaps in the planning exercise and discussed possible solutions to bridge them. He invited the audience's intervention into this process in an attempt to gain a multifaceted understanding of the problem at hand. In the process, the students were also acquainted with technical terminologies and data gathering sources and procedures, focusing on understanding as to what will "trigger" a behavioural change in each case and how to fulfil the desired communication objectives.

Thereafter, he gave a brief presentation on 'SBCC- Social and behavior change communication' to explain the levels of campaign planning (self, interpersonal level, community level and the enabling environment) the cross-cutting factors to it (information, motivation, ability to act and norms), the strategies of communication (behaviour change communication, social mobilization and advocacy), the need for SMART (specific, measurable, attainable/achievable, relevant, timely) objectives, and finally, the need to see things from a different perspective. In this regard, he stated, "we fall into trap doing the obvious, see beyond the obvious, take a challenge", emphasising that the best solutions may emerge when we look at things from a different perspective; a point he proved further with a series of optical illusions. As the workshop neared its end, he appreciated the collective efforts of the students towards the planning of the campaigns that had been presented and further boosted them with the words, "behaviour change initiation is easy, but behaviour change maintenance is difficult, strive for both, best of luck."

The International Conference on Pattern Recognition and Machine Intelligence (PReMI) is the most prestigious conference in the field of pattern recognition, machine learning, computational intelligence and related application areas. It is held every alternate year, preferably at different places. The 2005, 2007, 2013 and 2017 editions were held at the Indian Statistical Institute, Kolkata, India. The Indian Institute of Technology, New Delhi, India, hosted in 2009, the Higher School of Economics, Moscow, Russia, in 2011, and Warsaw University of Technology, Warsaw, Poland, in 2015. Just like previous editions, PReMI-19 at the Tezpur University, Tezpur, Assam, India was of four-days duration, the first day for tutorials and Doctoral symposium, followed by the three-day conference. It was attended by large number of researchers and leading experts from all over the world.

The primary goal of the conference was to present the state-of-the-art scientific results, encourage academic and industrial interaction, and promote collaborative research activities in pattern recognition, machine intelligence and related fields, involving scientists, engineers, professionals, researchers and students across the globe. PReMI 2019 received more than 341 submissions from 16 countries spanning six continents. After critical review, 90 papers were accepted for oral presentation and 41 for poster presentation. All 131 revised full papers were included in the proceedings, which were divided into eleven categories. The papers were presented by researchers in three parallel sessions on various theoretical and application areas, including new developments in deep learning, medical imaging, big-data analytics, and social media mining.

The conference took place in twenty-four sessions, each being preceded by a plenary speech or an invited talk. Besides these, PReMI-19 had a unique feature, namely, a Doctoral Symposium entitled "Professor C. A. Murthy Memorial Colloquium for Doctoral Candidates". Workshop on Participatory Media

20-01-2020 to 24-01-2020

A REPORT ON THE PARTICIPATORY AUDIO AND VIDEO PRODUCTION WORKSHOP

Resource Person- Debarun Dutta

Dated – 22nd January – 26th January 2020

OVERVIEW: The Department of Mass Communication and Journalism, Tezpur University has initiated a workshop from 22nd to 26th of January. It was conducted by Mr. Debarun Dutta, the executive director of Drishti. The workshop gave broad understanding about participatory audio/video, community media.

The workshop was basically done to understand about the concerns of community and development through of participatory audio/video.

The workshop included planning a proper strategy to conduct facilitation to the students, which also involved basic technical training for the students of Fakhruddin Ali Ahmed High School, Tezpur.

The workshop was very beneficial for the students of Borghat and Panchmile, where they were able to learn about the basics of videography and interviewing techniques. On the other hand, we also learned so many useful things from the workshop. It is a very good step to educate the students about the power of a camera and how they can use it as a tool to solve their problems.

The intended output of the workshop was to create three short films on three different issues in the community/school. Of which, topics were decided by the students themselves, we worked as a facilitator throughout the process of making the movies.

A participatory video is a form of participatory media in which a group or community creates its film. The idea behind this is that making a video is easy and accessible, and is a great way of bringing people together to explore issues, voice concerns or simply to be creative and tell stories. It is therefore primarily about the process, though high quality and accessible films (products) can be created using these methods if that is the desired outcome. This process can be very empowering, enabling a group or community to take their action to solve their problems, and also to communicate their needs and ideas to decision-makers and/or other groups and communities. As such, PV can be a highly effective tool to engage and mobilize marginalized people and to help them to implement their forms of sustainable development based on local needs.

1st session begins on 22nd January morning at 10 AM where we discussed poverty and tried to understand it from different angles and then we discussed underprivileged people and also shared our thoughts on that. The 2nd session started at 2:30 PM where we made a pitch document on the issues of the community and school. We made three different documents by three groups and our group made a pitch document on the development of Napam M.V. School and we also made a presentation on that document. We made some blunders in the initial attempt, which Debarun Dutta corrected and from which we acquired some important tips.

The next day 23rd January we interacted with the students of Napam M.V school and F.A.A High school. In the morning session, we interacted with the students of Napam. There was a total of 10 students all

were girls and these students gave us some very useful information about their school. The issues that they highlighted were no electric fan facility in their classroom, no drinking water facility in their school and the students also mentioned the poor washroom facility in the school.

The next session (4th session) was started at 3.30 p.m. where we interacted with students of Borghat. These students gave us some serious issues to work on, they told us about the practice of child marriage in their community, noise pollution by their neighbourhood and alcoholic, etc. Some of the students themselves had experienced these issues in their community and they shared their own experiences in the interaction. After selecting three issues we made three groups of students for shooting and scripting three short films. We made our planning for training the students later that evening.

On 24th January, we started to train the students. It was our 5th session of the workshop and in the first phase, we taught the students about the basics of videography through presentations which include different shot sizes, framing, angles, etc. Later we also give them some tips for interviewing people and then we gave them our phones to shoot different shots and to interview each other they were very interested to perform the given tasks and they completed it very easily.

The next day (25th January) the students shot the entire video. There were two boys Biplab and Muksidul both of them handled the camera beautifully and a girl of class X named Himadri interviewed the students and the teachers. We were very happy to see them working very nicely because we just taught them the earlier they and they were doing it with the least flaws.

Later that day we visited a youth club of LGB institute of mental health. Where Debarun Dutta had a session with the club members and he showed us some participatory videos.

We started our editing of the video on 26th January. It was a very long and lengthy process but fortunately, we completed the editing before evening and we screened all three films in the conference hall.

The key challenge of the workshop has to be time management because we had a very short deadline and making a participatory short film takes a lot of time. We have to train the students properly to shoot the film and then we have to complete the shooting and editing in 24 hours. We somehow managed everything by working overtime and we learned a life lesson from this workshop.

From this workshop especially in my case, I learned to never underestimate anyone. These school kids of class IX and X are very talented according to their age. Especially the two boys who handled the camera and the girl who interviewed everyone was doing their work so calmly and perfectly that I never felt to interrupt them at any time. They were doing the same thing that we taught them earlier in the training session and in some cases better than we had expected.
